System Policies Directory

POL-0001 System state must be backed up to the secure decentralized ledger every 15 minutes.

POL-0002 Emergency shut-off sequence triggers if discrepancy between physical sensors and DB exceeds 5% system-wide.

POL-0003 All automated POs (Purchase Orders) exceeding \$10,000 require human-in-the-loop validation.

POL-0004 System must run a machine learning drift check on the demand forecasting model every Sunday at 02:00 AM.

POL-0005 If central database latency exceeds 500ms for 3 consecutive pings, failover to local node cache.

POL-0006 Unidentified physical barcode scans must be routed to the quarantine queue immediately.

POL-0007 Autonomous guided vehicles (AGVs) must reduce speed by 20% in aisles where human presence is detected.

POL-0008 System memory utilization exceeding 85% must trigger an automated garbage collection cycle.

POL-0009 API tokens for third-party logistics providers must be rotated autonomously every 30 days.

POL-0010 Any manual override of an autonomous policy must be logged with the user's ID and a required justification field.

POL-0011 Auto-Payment [Supplier SUP008]: Clear invoices net-30 if overall order accuracy remains > 98%.

POL-0012 Escalation [Supplier SUP008]: Trigger human review alert if fill rate drops below 92% for 3 consecutive weeks.

POL-0013 Lead Time Audit [Supplier SUP008]: Apply a dynamic buffer of +2 days if moving average lead time increases by 10% month-over-month.

POL-0014 On-boarding [Supplier SUP008]: All new SKUs registered from this supplier start with a conservative 1-week test stock limit.

POL-0015 SLA Violation [Supplier SUP008]: Automatically flag a 2% penalty deduction from invoice payout for every day a shipment is late past the grace period.

POL-0016 Auto-Payment [Supplier SUP021]: Clear invoices net-30 if overall order accuracy remains > 98%.

POL-0017 Escalation [Supplier SUP021]: Trigger human review alert if fill rate drops below 92% for 3 consecutive weeks.

POL-0018 Lead Time Audit [Supplier SUP021]: Apply a dynamic buffer of +2 days if moving average lead time increases by 10% month-over-month.

POL-0019 On-boarding [Supplier SUP021]: All new SKUs registered from this supplier start with a conservative 1-week test stock limit.

POL-0020 SLA Violation [Supplier SUP021]: Automatically flag a 2% penalty deduction from invoice payout for every day a shipment is late past the grace period.

POL-0021 Auto-Payment [Supplier SUP019]: Clear invoices net-30 if overall order accuracy remains > 98%.

POL-0022 Escalation [Supplier SUP019]: Trigger human review alert if fill rate drops below 92% for 3 consecutive weeks.

POL-0023 Lead Time Audit [Supplier SUP019]: Apply a dynamic buffer of +2 days if moving average lead time increases by 10% month-over-month.

POL-0024 On-boarding [Supplier SUP019]: All new SKUs registered from this supplier start with a conservative 1-week test stock limit.

POL-0025 SLA Violation [Supplier SUP019]: Automatically flag a 2% penalty deduction from invoice payout for every day a shipment is late past the grace period.

POL-0026 Auto-Payment [Supplier SUP017]: Clear invoices net-30 if overall order accuracy remains > 98%.

POL-0027 Escalation [Supplier SUP017]: Trigger human review alert if fill rate drops below 92% for 3 consecutive weeks.

POL-0028 Lead Time Audit [Supplier SUP017]: Apply a dynamic buffer of +2 days if moving average lead time increases by 10% month-over-month.

POL-0029 On-boarding [Supplier SUP017]: All new SKUs registered from this supplier start with a conservative 1-week test stock limit.

POL-0030 SLA Violation [Supplier SUP017]: Automatically flag a 2% penalty deduction from invoice payout for every day a shipment is late past the grace period.

POL-0031 Auto-Payment [Supplier SUP007]: Clear invoices net-30 if overall order accuracy remains > 98%.

POL-0032 Escalation [Supplier SUP007]: Trigger human review alert if fill rate drops below 92% for 3 consecutive weeks.

POL-0033 Lead Time Audit [Supplier SUP007]: Apply a dynamic buffer of +2 days if moving average lead time increases by 10% month-over-month.

POL-0034 On-boarding [Supplier SUP007]: All new SKUs registered from this supplier start with a conservative 1-week test stock limit.

POL-0035 SLA Violation [Supplier SUP007]: Automatically flag a 2% penalty deduction from invoice payout for every day a shipment is late past the grace period.

POL-0036 Auto-Payment [Supplier SUP009]: Clear invoices net-30 if overall order accuracy remains > 98%.

POL-0037 Escalation [Supplier SUP009]: Trigger human review alert if fill rate drops below 92% for 3 consecutive weeks.

POL-0038 Lead Time Audit [Supplier SUP009]: Apply a dynamic buffer of +2 days if moving average lead time increases by 10% month-over-month.

POL-0039 On-boarding [Supplier SUP009]: All new SKUs registered from this supplier start with a conservative 1-week test stock limit.

POL-0040 SLA Violation [Supplier SUP009]: Automatically flag a 2% penalty deduction from invoice payout for every day a shipment is late past the grace period.

POL-0041 Auto-Payment [Supplier SUP024]: Clear invoices net-30 if overall order accuracy remains > 98%.

POL-0042 Escalation [Supplier SUP024]: Trigger human review alert if fill rate drops below 92% for 3 consecutive weeks.

POL-0043 Lead Time Audit [Supplier SUP024]: Apply a dynamic buffer of +2 days if moving average lead time increases by 10% month-over-month.

POL-0044 On-boarding [Supplier SUP024]: All new SKUs registered from this supplier start with a conservative 1-week test stock limit.

POL-0045 SLA Violation [Supplier SUP024]: Automatically flag a 2% penalty deduction from invoice payout for every day a shipment is late past the grace period.

POL-0046 Auto-Payment [Supplier SUP003]: Clear invoices net-30 if overall order accuracy remains > 98%.

POL-0047 Escalation [Supplier SUP003]: Trigger human review alert if fill rate drops below 92% for 3 consecutive weeks.

POL-0048 Lead Time Audit [Supplier SUP003]: Apply a dynamic buffer of +2 days if moving average lead time increases by 10% month-over-month.

POL-0049 On-boarding [Supplier SUP003]: All new SKUs registered from this supplier start with a conservative 1-week test stock limit.

POL-0050 SLA Violation [Supplier SUP003]: Automatically flag a 2% penalty deduction from invoice payout for every day a shipment is late past the grace period.

POL-0051 Auto-Payment [Supplier SUP016]: Clear invoices net-30 if overall order accuracy remains > 98%.

POL-0052 Escalation [Supplier SUP016]: Trigger human review alert if fill rate drops below 92% for 3 consecutive weeks.

POL-0053 Lead Time Audit [Supplier SUP016]: Apply a dynamic buffer of +2 days if moving average lead time increases by 10% month-over-month.

POL-0054 On-boarding [Supplier SUP016]: All new SKUs registered from this supplier start with a conservative 1-week test stock limit.

POL-0055 SLA Violation [Supplier SUP016]: Automatically flag a 2% penalty deduction from invoice payout for every day a shipment is late past the grace period.

POL-0056 Auto-Payment [Supplier SUP025]: Clear invoices net-30 if overall order accuracy remains > 98%.

POL-0057 Escalation [Supplier SUP025]: Trigger human review alert if fill rate drops below 92% for 3 consecutive weeks.

POL-0058 Lead Time Audit [Supplier SUP025]: Apply a dynamic buffer of +2 days if moving average lead time increases by 10% month-over-month.

POL-0059 On-boarding [Supplier SUP025]: All new SKUs registered from this supplier start with a conservative 1-week test stock limit.

POL-0060 SLA Violation [Supplier SUP025]: Automatically flag a 2% penalty deduction from invoice payout for every day a shipment is late past the grace period.

POL-0061 Auto-Payment [Supplier SUP020]: Clear invoices net-30 if overall order accuracy remains > 98%.

POL-0062 Escalation [Supplier SUP020]: Trigger human review alert if fill rate drops below 92% for 3 consecutive weeks.

POL-0063 Lead Time Audit [Supplier SUP020]: Apply a dynamic buffer of +2 days if moving average lead time increases by 10% month-over-month.

POL-0064 On-boarding [Supplier SUP020]: All new SKUs registered from this supplier start with a conservative 1-week test stock limit.

POL-0065 SLA Violation [Supplier SUP020]: Automatically flag a 2% penalty deduction from invoice payout for every day a shipment is late past the grace period.

POL-0066 Auto-Payment [Supplier SUP013]: Clear invoices net-30 if overall order accuracy remains > 98%.

POL-0067 Escalation [Supplier SUP013]: Trigger human review alert if fill rate drops below 92% for 3 consecutive weeks.

POL-0068 Lead Time Audit [Supplier SUP013]: Apply a dynamic buffer of +2 days if moving average lead time increases by 10% month-over-month.

POL-0069 On-boarding [Supplier SUP013]: All new SKUs registered from this supplier start with a conservative 1-week test stock limit.

POL-0070 SLA Violation [Supplier SUP013]: Automatically flag a 2% penalty deduction from invoice payout for every day a shipment is late past the grace period.

POL-0071 Auto-Payment [Supplier SUP010]: Clear invoices net-30 if overall order accuracy remains > 98%.

POL-0072 Escalation [Supplier SUP010]: Trigger human review alert if fill rate drops below 92% for 3 consecutive weeks.

POL-0073 Lead Time Audit [Supplier SUP010]: Apply a dynamic buffer of +2 days if moving average lead time increases by 10% month-over-month.

POL-0074 On-boarding [Supplier SUP010]: All new SKUs registered from this supplier start with a conservative 1-week test stock limit.

POL-0075 SLA Violation [Supplier SUP010]: Automatically flag a 2% penalty deduction from invoice payout for every day a shipment is late past the grace period.

POL-0076 Auto-Payment [Supplier SUP006]: Clear invoices net-30 if overall order accuracy remains > 98%.

POL-0077 Escalation [Supplier SUP006]: Trigger human review alert if fill rate drops below 92% for 3 consecutive weeks.

POL-0078 Lead Time Audit [Supplier SUP006]: Apply a dynamic buffer of +2 days if moving average lead time increases by 10% month-over-month.

POL-0079 On-boarding [Supplier SUP006]: All new SKUs registered from this supplier start with a conservative 1-week test stock limit.

POL-0080 SLA Violation [Supplier SUP006]: Automatically flag a 2% penalty deduction from invoice payout for every day a shipment is late past the grace period.

POL-0081 Auto-Payment [Supplier SUP022]: Clear invoices net-30 if overall order accuracy remains > 98%.

POL-0082 Escalation [Supplier SUP022]: Trigger human review alert if fill rate drops below 92% for 3 consecutive weeks.

POL-0083 Lead Time Audit [Supplier SUP022]: Apply a dynamic buffer of +2 days if moving average lead time increases by 10% month-over-month.

POL-0084 On-boarding [Supplier SUP022]: All new SKUs registered from this supplier start with a conservative 1-week test stock limit.

POL-0085 SLA Violation [Supplier SUP022]: Automatically flag a 2% penalty deduction from invoice payout for every day a shipment is late past the grace period.

POL-0086 Auto-Payment [Supplier SUP004]: Clear invoices net-30 if overall order accuracy remains > 98%.

POL-0087 Escalation [Supplier SUP004]: Trigger human review alert if fill rate drops below 92% for 3 consecutive weeks.

POL-0088 Lead Time Audit [Supplier SUP004]: Apply a dynamic buffer of +2 days if moving average lead time increases by 10% month-over-month.

POL-0089 On-boarding [Supplier SUP004]: All new SKUs registered from this supplier start with a conservative 1-week test stock limit.

POL-0090 SLA Violation [Supplier SUP004]: Automatically flag a 2% penalty deduction from invoice payout for every day a shipment is late past the grace period.

POL-0091 Auto-Payment [Supplier SUP002]: Clear invoices net-30 if overall order accuracy remains > 98%.

POL-0092 Escalation [Supplier SUP002]: Trigger human review alert if fill rate drops below 92% for 3 consecutive weeks.

POL-0093 Lead Time Audit [Supplier SUP002]: Apply a dynamic buffer of +2 days if moving average lead time increases by 10% month-over-month.

POL-0094 On-boarding [Supplier SUP002]: All new SKUs registered from this supplier start with a conservative 1-week test stock limit.

POL-0095 SLA Violation [Supplier SUP002]: Automatically flag a 2% penalty deduction from invoice payout for every day a shipment is late past the grace period.

POL-0096 Auto-Payment [Supplier SUP023]: Clear invoices net-30 if overall order accuracy remains > 98%.

POL-0097 Escalation [Supplier SUP023]: Trigger human review alert if fill rate drops below 92% for 3 consecutive weeks.

POL-0098 Lead Time Audit [Supplier SUP023]: Apply a dynamic buffer of +2 days if moving average lead time increases by 10% month-over-month.

POL-0099 On-boarding [Supplier SUP023]: All new SKUs registered from this supplier start with a conservative 1-week test stock limit.

POL-0100 SLA Violation [Supplier SUP023]: Automatically flag a 2% penalty deduction from invoice payout for every day a shipment is late past the grace period.

POL-0101 Auto-Payment [Supplier SUP026]: Clear invoices net-30 if overall order accuracy remains > 98%.

POL-0102 Escalation [Supplier SUP026]: Trigger human review alert if fill rate drops below 92% for 3 consecutive weeks.

POL-0103 Lead Time Audit [Supplier SUP026]: Apply a dynamic buffer of +2 days if moving average lead time increases by 10% month-over-month.

POL-0104 On-boarding [Supplier SUP026]: All new SKUs registered from this supplier start with a conservative 1-week test stock limit.

POL-0105 SLA Violation [Supplier SUP026]: Automatically flag a 2% penalty deduction from invoice payout for every day a shipment is late past the grace period.

POL-0106 Auto-Payment [Supplier SUP027]: Clear invoices net-30 if overall order accuracy remains > 98%.

POL-0107 Escalation [Supplier SUP027]: Trigger human review alert if fill rate drops below 92% for 3 consecutive weeks.

POL-0108 Lead Time Audit [Supplier SUP027]: Apply a dynamic buffer of +2 days if moving average lead time increases by 10% month-over-month.

POL-0109 On-boarding [Supplier SUP027]: All new SKUs registered from this supplier start with a conservative 1-week test stock limit.

POL-0110 SLA Violation [Supplier SUP027]: Automatically flag a 2% penalty deduction from invoice payout for every day a shipment is late past the grace period.

POL-0111 Auto-Payment [Supplier SUP015]: Clear invoices net-30 if overall order accuracy remains > 98%.

POL-0112 Escalation [Supplier SUP015]: Trigger human review alert if fill rate drops below 92% for 3 consecutive weeks.

POL-0113 Lead Time Audit [Supplier SUP015]: Apply a dynamic buffer of +2 days if moving average lead time increases by 10% month-over-month.

POL-0114 On-boarding [Supplier SUP015]: All new SKUs registered from this supplier start with a conservative 1-week test stock limit.

POL-0115 SLA Violation [Supplier SUP015]: Automatically flag a 2% penalty deduction from invoice payout for every day a shipment is late past the grace period.

POL-0116 Auto-Payment [Supplier SUP014]: Clear invoices net-30 if overall order accuracy remains > 98%.

POL-0117 Escalation [Supplier SUP014]: Trigger human review alert if fill rate drops below 92% for 3 consecutive weeks.

POL-0118 Lead Time Audit [Supplier SUP014]: Apply a dynamic buffer of +2 days if moving average lead time increases by 10% month-over-month.

POL-0119 On-boarding [Supplier SUP014]: All new SKUs registered from this supplier start with a conservative 1-week test stock limit.

POL-0120 SLA Violation [Supplier SUP014]: Automatically flag a 2% penalty deduction from invoice payout for every day a shipment is late past the grace period.

POL-0121 Auto-Payment [Supplier SUP001]: Clear invoices net-30 if overall order accuracy remains > 98%.

POL-0122 Escalation [Supplier SUP001]: Trigger human review alert if fill rate drops below 92% for 3 consecutive weeks.

POL-0123 Lead Time Audit [Supplier SUP001]: Apply a dynamic buffer of +2 days if moving average lead time increases by 10% month-over-month.

POL-0124 On-boarding [Supplier SUP001]: All new SKUs registered from this supplier start with a conservative 1-week test stock limit.

POL-0125 SLA Violation [Supplier SUP001]: Automatically flag a 2% penalty deduction from invoice payout for every day a shipment is late past the grace period.

POL-0126 Auto-Payment [Supplier SUP018]: Clear invoices net-30 if overall order accuracy remains > 98%.

POL-0127 Escalation [Supplier SUP018]: Trigger human review alert if fill rate drops below 92% for 3 consecutive weeks.

POL-0128 Lead Time Audit [Supplier SUP018]: Apply a dynamic buffer of +2 days if moving average lead time increases by 10% month-over-month.

POL-0129 On-boarding [Supplier SUP018]: All new SKUs registered from this supplier start with a conservative 1-week test stock limit.

POL-0130 SLA Violation [Supplier SUP018]: Automatically flag a 2% penalty deduction from invoice payout for every day a shipment is late past the grace period.

POL-0131 Auto-Payment [Supplier SUP030]: Clear invoices net-30 if overall order accuracy remains > 98%.

POL-0132 Escalation [Supplier SUP030]: Trigger human review alert if fill rate drops below 92% for 3 consecutive weeks.

POL-0133 Lead Time Audit [Supplier SUP030]: Apply a dynamic buffer of +2 days if moving average lead time increases by 10% month-over-month.

POL-0134 On-boarding [Supplier SUP030]: All new SKUs registered from this supplier start with a conservative 1-week test stock limit.

POL-0135 SLA Violation [Supplier SUP030]: Automatically flag a 2% penalty deduction from invoice payout for every day a shipment is late past the grace period.

POL-0136 Auto-Payment [Supplier SUP028]: Clear invoices net-30 if overall order accuracy remains > 98%.

POL-0137 Escalation [Supplier SUP028]: Trigger human review alert if fill rate drops below 92% for 3 consecutive weeks.

POL-0138 Lead Time Audit [Supplier SUP028]: Apply a dynamic buffer of +2 days if moving average lead time increases by 10% month-over-month.

POL-0139 On-boarding [Supplier SUP028]: All new SKUs registered from this supplier start with a conservative 1-week test stock limit.

POL-0140 SLA Violation [Supplier SUP028]: Automatically flag a 2% penalty deduction from invoice payout for every day a shipment is late past the grace period.

POL-0141 Auto-Payment [Supplier SUP029]: Clear invoices net-30 if overall order accuracy remains > 98%.

POL-0142 Escalation [Supplier SUP029]: Trigger human review alert if fill rate drops below 92% for 3 consecutive weeks.

POL-0143 Lead Time Audit [Supplier SUP029]: Apply a dynamic buffer of +2 days if moving average lead time increases by 10% month-over-month.

POL-0144 On-boarding [Supplier SUP029]: All new SKUs registered from this supplier start with a conservative 1-week test stock limit.

POL-0145 SLA Violation [Supplier SUP029]: Automatically flag a 2% penalty deduction from invoice payout for every day a shipment is late past the grace period.

POL-0146 Auto-Payment [Supplier SUP012]: Clear invoices net-30 if overall order accuracy remains > 98%.

POL-0147 Escalation [Supplier SUP012]: Trigger human review alert if fill rate drops below 92% for 3 consecutive weeks.

POL-0148 Lead Time Audit [Supplier SUP012]: Apply a dynamic buffer of +2 days if moving average lead time increases by 10% month-over-month.

POL-0149 On-boarding [Supplier SUP012]: All new SKUs registered from this supplier start with a conservative 1-week test stock limit.

POL-0150 SLA Violation [Supplier SUP012]: Automatically flag a 2% penalty deduction from invoice payout for every day a shipment is late past the grace period.

POL-0151 Auto-Payment [Supplier SUP005]: Clear invoices net-30 if overall order accuracy remains > 98%.

POL-0152 Escalation [Supplier SUP005]: Trigger human review alert if fill rate drops below 92% for 3 consecutive weeks.

POL-0153 Lead Time Audit [Supplier SUP005]: Apply a dynamic buffer of +2 days if moving average lead time increases by 10% month-over-month.

POL-0154 On-boarding [Supplier SUP005]: All new SKUs registered from this supplier start with a conservative 1-week test stock limit.

POL-0155 SLA Violation [Supplier SUP005]: Automatically flag a 2% penalty deduction from invoice payout for every day a shipment is late past the grace period.

POL-0156 Auto-Payment [Supplier SUP011]: Clear invoices net-30 if overall order accuracy remains > 98%.

POL-0157 Escalation [Supplier SUP011]: Trigger human review alert if fill rate drops below 92% for 3 consecutive weeks.

POL-0158 Lead Time Audit [Supplier SUP011]: Apply a dynamic buffer of +2 days if moving average lead time increases by 10% month-over-month.

POL-0159 On-boarding [Supplier SUP011]: All new SKUs registered from this supplier start with a conservative 1-week test stock limit.

POL-0160 SLA Violation [Supplier SUP011]: Automatically flag a 2% penalty deduction from invoice payout for every day a shipment is late past the grace period.

POL-0161 Markdown Tier [Apple]: If a batch is exactly 1 days from its expiry date, apply an automatic 3% discount to its base price of \$363.70 to accelerate liquidation.

POL-0162 Markdown Tier [Apple]: If a batch is exactly 2 days from its expiry date, apply an automatic 6% discount to its base price of \$363.70 to accelerate liquidation.

POL-0163 Markdown Tier [Apple]: If a batch is exactly 3 days from its expiry date, apply an automatic 9% discount to its base price of \$363.70 to accelerate liquidation.

POL-0164 Markdown Tier [Apple]: If a batch is exactly 4 days from its expiry date, apply an automatic 12% discount to its base price of \$363.70 to accelerate liquidation.

POL-0165 Markdown Tier [Apple]: If a batch is exactly 5 days from its expiry date, apply an automatic 15% discount to its base price of \$363.70 to accelerate liquidation.

POL-0166 Markdown Tier [Apple]: If a batch is exactly 6 days from its expiry date, apply an automatic 18% discount to its base price of \$363.70 to accelerate liquidation.

POL-0167 Markdown Tier [Apple]: If a batch is exactly 7 days from its expiry date, apply an automatic 21% discount to its base price of \$363.70 to accelerate liquidation.

POL-0168 Markdown Tier [Apple]: If a batch is exactly 8 days from its expiry date, apply an automatic 24% discount to its base price of \$363.70 to accelerate liquidation.

POL-0169 Markdown Tier [Apple]: If a batch is exactly 9 days from its expiry date, apply an automatic 27% discount to its base price of \$363.70 to accelerate liquidation.

POL-0170 Markdown Tier [Apple]: If a batch is exactly 10 days from its expiry date, apply an automatic 30% discount to its base price of \$363.70 to accelerate liquidation.

POL-0171 Markdown Tier [Apple]: If a batch is exactly 11 days from its expiry date, apply an automatic 33% discount to its base price of \$363.70 to accelerate liquidation.

POL-0172 Markdown Tier [Apple]: If a batch is exactly 12 days from its expiry date, apply an automatic 36% discount to its base price of \$363.70 to accelerate liquidation.

POL-0173 Markdown Tier [Apple]: If a batch is exactly 13 days from its expiry date, apply an automatic 39% discount to its base price of \$363.70 to accelerate liquidation.

POL-0174 Markdown Tier [Apple]: If a batch is exactly 14 days from its expiry date, apply an automatic 42% discount to its base price of \$363.70 to accelerate liquidation.

POL-0175 Dynamic ROP [Apple]: If the rolling 14-day demand variance is 0.5x the historical baseline, automatically adjust the Reorder Point to 18 units.

POL-0176 Dynamic ROP [Apple]: If the rolling 14-day demand variance is 0.75x the historical baseline, automatically adjust the Reorder Point to 28 units.

POL-0177 Dynamic ROP [Apple]: If the rolling 14-day demand variance is 1.0x the historical baseline, automatically adjust the Reorder Point to 37 units.

POL-0178 Dynamic ROP [Apple]: If the rolling 14-day demand variance is 1.1x the historical baseline, automatically adjust the Reorder Point to 41 units.

POL-0179 Dynamic ROP [Apple]: If the rolling 14-day demand variance is 1.25x the historical baseline, automatically adjust the Reorder Point to 47 units.

POL-0180 Dynamic ROP [Apple]: If the rolling 14-day demand variance is 1.4x the historical baseline, automatically adjust the Reorder Point to 53 units.

POL-0181 Dynamic ROP [Apple]: If the rolling 14-day demand variance is 1.5x the historical baseline, automatically adjust the Reorder Point to 56 units.

POL-0182 Dynamic ROP [Apple]: If the rolling 14-day demand variance is 1.75x the historical baseline, automatically adjust the Reorder Point to 66 units.

POL-0183 Dynamic ROP [Apple]: If the rolling 14-day demand variance is 2.0x the historical baseline, automatically adjust the Reorder Point to 75 units.

POL-0184 Dynamic ROP [Apple]: If the rolling 14-day demand variance is 2.25x the historical baseline, automatically adjust the Reorder Point to 85 units.

POL-0185 Dynamic ROP [Apple]: If the rolling 14-day demand variance is 2.5x the historical baseline, automatically adjust the Reorder Point to 94 units.

POL-0186 Dynamic ROP [Apple]: If the rolling 14-day demand variance is 3.0x the historical baseline, automatically adjust the Reorder Point to 113 units.

POL-0187 Quality Trigger [Apple]: If the trailing 7-day average customer rating falls below 2.5/5.0, immediately flag current warehouse stock for an automated quality inspection routing.

POL-0188 Quality Trigger [Apple]: If the trailing 7-day average customer rating falls below 2.8/5.0, immediately flag current warehouse stock for an automated quality inspection routing.

POL-0189 Quality Trigger [Apple]: If the trailing 7-day average customer rating falls below 3.0/5.0, immediately flag current warehouse stock for an automated quality inspection routing.

POL-0190 Quality Trigger [Apple]: If the trailing 7-day average customer rating falls below 3.2/5.0, immediately flag current warehouse stock for an automated quality inspection routing.

POL-0191 Quality Trigger [Apple]: If the trailing 7-day average customer rating falls below 3.5/5.0, immediately flag current warehouse stock for an automated quality inspection routing.

POL-0192 Quality Trigger [Apple]: If the trailing 7-day average customer rating falls below 3.8/5.0, immediately flag current warehouse stock for an automated quality inspection routing.

POL-0193 Quality Trigger [Apple]: If the trailing 7-day average customer rating falls below 4.0/5.0, immediately flag current warehouse stock for an automated quality inspection routing.

POL-0194 Quality Trigger [Apple]: If the trailing 7-day average customer rating falls below 4.2/5.0, immediately flag current warehouse stock for an automated quality inspection routing.

POL-0195 Quality Trigger [Apple]: If the trailing 7-day average customer rating falls below 4.5/5.0, immediately flag current warehouse stock for an automated quality inspection routing.

POL-0196 Quality Trigger [Apple]: If the trailing 7-day average customer rating falls below 4.7/5.0, immediately flag current warehouse stock for an automated quality inspection routing.

POL-0197 Overstock Limit [Apple]: Halt all automated purchasing algorithms for this SKU if current stock exceeds 176 units (equivalent to 2 weeks of projected supply).

POL-0198 Overstock Limit [Apple]: Halt all automated purchasing algorithms for this SKU if current stock exceeds 265 units (equivalent to 3 weeks of projected supply).

POL-0199 Overstock Limit [Apple]: Halt all automated purchasing algorithms for this SKU if current stock exceeds 353 units (equivalent to 4 weeks of projected supply).

POL-0200 Overstock Limit [Apple]: Halt all automated purchasing algorithms for this SKU if current stock exceeds 442 units (equivalent to 5 weeks of projected supply).

POL-0201 Overstock Limit [Apple]: Halt all automated purchasing algorithms for this SKU if current stock exceeds 530 units (equivalent to 6 weeks of projected supply).

POL-0202 Overstock Limit [Apple]: Halt all automated purchasing algorithms for this SKU if current stock exceeds 619 units (equivalent to 7 weeks of projected supply).

POL-0203 Overstock Limit [Apple]: Halt all automated purchasing algorithms for this SKU if current stock exceeds 707 units (equivalent to 8 weeks of projected supply).

POL-0204 Overstock Limit [Apple]: Halt all automated purchasing algorithms for this SKU if current stock exceeds 795 units (equivalent to 9 weeks of projected supply).

POL-0205 Overstock Limit [Apple]: Halt all automated purchasing algorithms for this SKU if current stock exceeds 884 units (equivalent to 10 weeks of projected supply).

POL-0206 Overstock Limit [Apple]: Halt all automated purchasing algorithms for this SKU if current stock exceeds 972 units (equivalent to 11 weeks of projected supply).

POL-1059 Markdown Tier [Onion]: If a batch is exactly 3 days from its expiry date, apply an automatic 9% discount to its base price of \$457.61 to accelerate liquidation.

POL-1060 Markdown Tier [Onion]: If a batch is exactly 4 days from its expiry date, apply an automatic 12% discount to its base price of \$457.61 to accelerate liquidation.

POL-1061 Markdown Tier [Onion]: If a batch is exactly 5 days from its expiry date, apply an automatic 15% discount to its base price of \$457.61 to accelerate liquidation.

POL-1062 Markdown Tier [Onion]: If a batch is exactly 6 days from its expiry date, apply an automatic 18% discount to its base price of \$457.61 to accelerate liquidation.

POL-1063 Markdown Tier [Onion]: If a batch is exactly 7 days from its expiry date, apply an automatic 21% discount to its base price of \$457.61 to accelerate liquidation.

POL-1064 Markdown Tier [Onion]: If a batch is exactly 8 days from its expiry date, apply an automatic 24% discount to its base price of \$457.61 to accelerate liquidation.

POL-1065 Markdown Tier [Onion]: If a batch is exactly 9 days from its expiry date, apply an automatic 27% discount to its base price of \$457.61 to accelerate liquidation.

POL-1066 Markdown Tier [Onion]: If a batch is exactly 10 days from its expiry date, apply an automatic 30% discount to its base price of \$457.61 to accelerate liquidation.

POL-1067 Markdown Tier [Onion]: If a batch is exactly 11 days from its expiry date, apply an automatic 33% discount to its base price of \$457.61 to accelerate liquidation.

POL-1068 Markdown Tier [Onion]: If a batch is exactly 12 days from its expiry date, apply an automatic 36% discount to its base price of \$457.61 to accelerate liquidation.

POL-1069 Markdown Tier [Onion]: If a batch is exactly 13 days from its expiry date, apply an automatic 39% discount to its base price of \$457.61 to accelerate liquidation.

POL-1070 Markdown Tier [Onion]: If a batch is exactly 14 days from its expiry date, apply an automatic 42% discount to its base price of \$457.61 to accelerate liquidation.

POL-1071 Dynamic ROP [Onion]: If the rolling 14-day demand variance is 0.5x the historical baseline, automatically adjust the Reorder Point to 61 units.

POL-1072 Dynamic ROP [Onion]: If the rolling 14-day demand variance is 0.75x the historical baseline, automatically adjust the Reorder Point to 92 units.

POL-1073 Dynamic ROP [Onion]: If the rolling 14-day demand variance is 1.0x the historical baseline, automatically adjust the Reorder Point to 123 units.

POL-1074 Dynamic ROP [Onion]: If the rolling 14-day demand variance is 1.1x the historical baseline, automatically adjust the Reorder Point to 136 units.

POL-1075 Dynamic ROP [Onion]: If the rolling 14-day demand variance is 1.25x the historical baseline, automatically adjust the Reorder Point to 154 units.

POL-1076 Dynamic ROP [Onion]: If the rolling 14-day demand variance is 1.4x the historical baseline, automatically adjust the Reorder Point to 173 units.

POL-1077 Dynamic ROP [Onion]: If the rolling 14-day demand variance is 1.5x the historical baseline, automatically adjust the Reorder Point to 185 units.

POL-1078 Dynamic ROP [Onion]: If the rolling 14-day demand variance is 1.75x the historical baseline, automatically adjust the Reorder Point to 216 units.

POL-1079 Dynamic ROP [Onion]: If the rolling 14-day demand variance is 2.0x the historical baseline, automatically adjust the Reorder Point to 247 units.

POL-1080 Dynamic ROP [Onion]: If the rolling 14-day demand variance is 2.25x the historical baseline, automatically adjust the Reorder Point to 278 units.

POL-1081 Dynamic ROP [Onion]: If the rolling 14-day demand variance is 2.5x the historical baseline, automatically adjust the Reorder Point to 309 units.

POL-1082 Dynamic ROP [Onion]: If the rolling 14-day demand variance is 3.0x the historical baseline, automatically adjust the Reorder Point to 371 units.

POL-1083 Quality Trigger [Onion]: If the trailing 7-day average customer rating falls below 2.5/5.0, immediately flag current warehouse stock for an automated quality inspection routing.

POL-1084 Quality Trigger [Onion]: If the trailing 7-day average customer rating falls below 2.8/5.0, immediately flag current warehouse stock for an automated quality inspection routing.

POL-1085 Quality Trigger [Onion]: If the trailing 7-day average customer rating falls below 3.0/5.0, immediately flag current warehouse stock for an automated quality inspection routing.

POL-1086 Quality Trigger [Onion]: If the trailing 7-day average customer rating falls below 3.2/5.0, immediately flag current warehouse stock for an automated quality inspection routing.

POL-1087 Quality Trigger [Onion]: If the trailing 7-day average customer rating falls below 3.5/5.0, immediately flag current warehouse stock for an automated quality inspection routing.

POL-1088 Quality Trigger [Onion]: If the trailing 7-day average customer rating falls below 3.8/5.0, immediately flag current warehouse stock for an automated quality inspection routing.

POL-1089 Quality Trigger [Onion]: If the trailing 7-day average customer rating falls below 4.0/5.0, immediately flag current warehouse stock for an automated quality inspection routing.

POL-1090 Quality Trigger [Onion]: If the trailing 7-day average customer rating falls below 4.2/5.0, immediately flag current warehouse stock for an automated quality inspection routing.

POL-1091 Quality Trigger [Onion]: If the trailing 7-day average customer rating falls below 4.5/5.0, immediately flag current warehouse stock for an automated quality inspection routing.

POL-1092 Quality Trigger [Onion]: If the trailing 7-day average customer rating falls below 4.7/5.0, immediately flag current warehouse stock for an automated quality inspection routing.

POL-1093 Overstock Limit [Onion]: Halt all automated purchasing algorithms for this SKU if current stock exceeds 157 units (equivalent to 2 weeks of projected supply).

POL-1094 Overstock Limit [Onion]: Halt all automated purchasing algorithms for this SKU if current stock exceeds 236 units (equivalent to 3 weeks of projected supply).

POL-1095 Overstock Limit [Onion]: Halt all automated purchasing algorithms for this SKU if current stock exceeds 315 units (equivalent to 4 weeks of projected supply).

POL-1096 Overstock Limit [Onion]: Halt all automated purchasing algorithms for this SKU if current stock exceeds 394 units (equivalent to 5 weeks of projected supply).

POL-1097 Overstock Limit [Onion]: Halt all automated purchasing algorithms for this SKU if current stock exceeds 473 units (equivalent to 6 weeks of projected supply).

POL-1098 Overstock Limit [Onion]: Halt all automated purchasing algorithms for this SKU if current stock exceeds 552 units (equivalent to 7 weeks of projected supply).

POL-1099 Overstock Limit [Onion]: Halt all automated purchasing algorithms for this SKU if current stock exceeds 630 units (equivalent to 8 weeks of projected supply).

POL-1100 Overstock Limit [Onion]: Halt all automated purchasing algorithms for this SKU if current stock exceeds 709 units (equivalent to 9 weeks of projected supply).
